About This Game

CUTE MONSTERS BATTLE ARENA is a massively addictive turn based strategy RPG with intense action and difficult puzzles.

This game allows the user to become a great cutie master trainer, capture more than 1200 outstanding monsters, upgrade their skills and form deadly strategies to defeat his enemies.

Explore incredible worlds in your journey, from big modern cities to traditional villages, pirate islands, icy frozen arctic landscapes to hot pyramid deserts and hunted realms full of the undead darkness forces.

Meet a lot of friends and enemies in your quest to become the ultimate beast master.

Capture as many powerful monsters as you can to constantly make your team stronger and use the weak ones as fusing material for your favorite ones.

Catch all the creatures that fight you and evolve them into new, stronger forms.

From tigers to lions, from eagles to dragons, from wolves to monkeys to powerful insects, from mythical creatures to ordinary monsters you have to use their magical skills and fight these fantastic foes.

The war has already started. To survive these games you need a powerful guild so always know it's strengths and weaknesses as well as a great battle strategy.

Play with your friends using our multiplayer features and use their powers and skills as summoners allies!

Collect Diamonds and Coins to summon better magical beasts with fantasy like abilities.

Jump key doesn't work half the time, lame, very lame. And the platforms that go up and down except for when you jump on to them, that's just annoying. Games should be fun, not annoying.

Not recommended until the controls work properly.. The submarine control interface is poorly designed and makes the game nearly unplayable. Further, there is a glitch that causes you to warp through the walls when you are diving outside the submarine. When in Dive mode, C4 sometimes doesn't trigger and if you have to move diagonally in an inclosed space, you can get hung up on the terrain. Way too much trouble and not fun. Refund requested.. i used this on my old pvc dual core. found new versions of the dfrivers.. from 2011

used it on my newer system when i first installed evreyhiong found the drivers

i have the full lifetime licence..

went too update my drivers.. backed them up first

then my usb hubs stopped working.. so i restored the old drivers and.. wow usb hub works..

..

also the ability too clean unplugged devices is awesome. Q: Can AquaNox2 correct for the writing and design of the original AquaNox?

A: Yes! Questionable politics has been replaced by an awesome grandmother, and the interface is much better and more immersive.. The Lords of the Earth Flame is a short (about 1 hour) game. The game itself is an interactive story. Too bad the game is too static. If you die you've to replay all the scenes. Overall I liked it and that's the most important fact.

P.S. Get this game in a sale. Otherwise it will be too expensive for the time you'll play this game.

reminds me of eye of the beholder, a good old school dungeon crawler.. surprisingly fun co-op, though it has a loot crate system to reward you with trying to learn and find all the traps and exits. in this scenario, i find it acceptable, however knowing that there's a steam marketplace kind of makes it easy to "p2w" and buy all the looks, appearances, clothes, etc. which I guess is also cool if someone does that. Overall though, fun gameplay, hilarious deaths, i can see more coming from out of it.. A good game overall. BUT With that there is a huge con you can't use the tanks and vehicles in the Centauro DLC if you have it which is sad.. If, like me, you have played Total War since before you can remember (and also re-bought them all on steam just so they are there) - then this is a game you will love.

It takes everything that Total War was, and improves on it by a factor of 10.

My only gripe is that the fighting between units is not as on par as with Shogun 2, when they do connect they are beautiful and fun to watch.

100% BUY IF YOU LOVE TOTAL WAR. Pretty much on the lines of Zuma's Revenge and similar bubble poppers. This is a treat to the eyes and a pretty enjoyable time eater. Just when you are bored of fragging zombies and killing people, or running through dungeons, just sit back and enjoy this game. :). If you are serious about video playback, and need to tweak and customize how video is played then Zoom Player is definitely for you. Sure, VLC and MPC play "everything" and are free. But honestly - their user interface is a mess, it's hard to figure out where to customize playback and settings. They work fine for a basic user who just wants to play a file, but lacks a lot in the options and features.

Zoom Player has a ton of features, while making it easy to find the basic settings. The Advanced menu is huge, and it also has a search function to easily find the settings you want which is a huge bonus.

The intergrated Install Center allows you to download all the codecs you need to play 99% of all video out there: LAV Filter, FFDSHow, MadVR, AC3filter and so on. There's no need to download those huge and confusing "codec-packs" that in my experience just mess up your playback.

There's a free version as well, available on the developer site, and it does basically everything the Steam version does, but you get some extra features here, and you are supporting a quality product (which IMO is important as well).

The most lacking feature might be the network streaming, like VLC has. But then again VLC was built from the ground up to be a networked media player.

I've been using Zoom for years now, and it outclasses all the other media players I've tried.

Personally I'd rather get it from the developers themselves, but having it in Steam is a nice addition.
